STUD GUARDS

With today's emphasis on safety, many building codes now require metal plates on studs. Western Wire's self-nailing Stud Guards help protect electrical cable and copper tubing from penetration of nails or screws during construction work. Stud Guards also help prevent serious accidents during do-it-yourself projects.

Original design of Western Wire Stud Guards assures quick application and firm hold.

The 1-1/2" Stud Guards are available in 3", 5" and 6" lengths to meet all code requirements.
